**DETAILED ACTION**

**Election / Restriction**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-8, drawn to an ice detector having a sensing element with evolutionary profiles.

Group II. Claims 9-11, drawn to an ice detector having a sensing element with a deflector to increase the local concentration of the droplets.

Group III. Claim 12, drawn to an ice detector having a system for indicating the severity of the icing conditions through the analysis of the oscillation frequency.

Group IV. Claims 13-15, drawn to an ice detector having two independent electrical circuits for powering to the sensing element and the strut.

2. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III & IV restriction for examination purposes as indicated is proper.

If Applicant selects group I for examining, then groups II, III & IV must be cancelled.

3. Because these inventions are distinct for the reasons given above and the search required a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
